

Handheld Aquarium Salinity Refractometer RHS-203ATC

Overview

Model Number	RHS-203ATC Handheld salinity refractometer		
Size	30*40*205mm		
Weight	0.35KGS		
Measurement Accuracy	0-28% Salinity,0-32% Brix		
Min. Div.	Salinity: 0.2%		
Brix Range	Salinity		
Brix Min. Div.	Aquarium		
Measurement Range	0-28% Salinity,0-32% Brix		
Automatic Temperature Compensation Range	10°C-30°C		
Packaging Details	20pcs/ctn 46x24x22cm	GW	7.5KGS

Description

It's FULLY EQUIPPED with ATC that automatically adjust itself to correct temperature discrepancies during use. It's capable of measuring with high accuracy and provides precise results. It's equipped with vivid and sharp reticle chart for easy and comfortable reading. It uses ambient light only and no batteries are needed. It's made by experienced craftsmen and are unlikely to break down!

Specifications

Measuring Range: 0-28% Salinity,0-32% Brix
(ATC) Temperature Compensation Range:10°C--30°C
Determines the amount of dissolved salt and dissolved solids
Approved by strict quality and safety standards
Durable and built to last long
Heavy-duty and lightweight with its aluminum construction
Easy to focus and calibrate
Accurate testing results guaranteed
Made with the highest and finest quality of aluminum & rubber that makes it lightweight
Cushioned with soft & comfortable non-slip rubber
Extremely easy-to-use and calibrate
